Complément de programmation

Maven :

        #Gén POM avec archetype :

```
`mvn archetype : generate \
-DarchetypeGroupeId=org.apache.maven.archetypes \
-DarchetypeArtifactId=maven-archetype-quickstart \
-DinteractiveMode=false \
-DartifactId=MonProjey \
-Dversion=1.0-SNAPSHOT`
```

        Dépendance :

```
<dependencies>
 <dependency>
   <groupId>junit</groupId>
   <artifactId> junit</artifactId>
   <version>v</version>
   <scope>test</scope>
 </depedency>
</depedencies>
```

git :

```
git init
git branch [br_name]
git checkout [br_name]
git add [files]
git commit -m [message]
git push
```

Arborescence projet :

```
src/main/mon/package/source
src/test/mon/package/test
```
